Sleman, Yogyakarta

Summary

As a software developer at Indomaret Group, I have been developing web services, APIs, full-stack applications, and console apps based on user requests, from development to deployment. I have also created and managed a web service for virtual transactions, especially an API for payment aggregation between clients and partners using .NET Core. Additionally, I have developed other software like web and console apps for various needs. I am passionate about learning new technologies and applying them to solve real-world problems.

Skills

.NET, React.js, Next.js, Node.js, API Development, CI/CD (Git, Docker), Machine Learning, Python
